Digital Graphics

Do you believe your child can be the next great painter? Thanks to the technology advancement, with the help of graphic tablet and powerful drawing software, Silver and Gold students can create impressive piece of art even without knowing how to draw with traditional drawing tools in the first place.

For Platinum students, how about being the next great photographer? People nowadays can shoot anywhere at anytime with their mobile devices or cameras. Learning Photo Editing can ensure you that there will always be good photos around you even if you are not in good condition that day.

- Lesson** : 8

Animate Production

Every kid loves comics and animations. Has your child ever dream of creating his own animations? Here is a great chance to become an animation director!

First, student will discuss their story in mind with teachers and present their ideas with storyboard. Next, Silver students will create their scenery and characters in Animatron, an animation software which is free and easy to use with lots of cool function, and create HTML5 animation. For Gold and Platinum students, they will use a free popular animation software, Pencil2D, to create splendid interactive animation that allows audience to chose their ending.
